Perfiles de aluminio

Aluminium profiles

La serie TECOX/ECOX de FULLWAT constituye el complemento ideal para conseguir un acabado perfecto en cada una de las instalaciones de iluminación decorativa con diodos led.

TECOX/ECOX series from FULLWAT is suitable for best performance and perfect finishing in decorative led lighting applications.

Los perfiles de aluminio FULLWAT, cuentan con todo lo necesario para lograr ese toque de diferenciación en los proyectos que nuestros clientes llevan a cabo con los productos presentes en las distintas secciones de este catálogo. Nuestra gama de perfiles permite lograr un doble objetivo:

– Dotar de la estabilidad térmica y disipación necesarias para cada línea de iluminación led.

– Una mejora estética de la instalación, personalizando cada proyecto.

En las páginas posteriores se ofrecen soluciones diversas para empotrar o para montaje sobre superficie.

Hay distintos modelos para cada aplicación y en cada uno de ellos, encontrará los accesorios correspondientes para una fijación rápida y sobre todo, un resultado profesional.

El aluminio con el que se fabrican nuestros perfiles es de primera calidad tipo 6063, con acabado anodizado.

Consulte con nuestro departamento comercial para solicitar medidas de corte diferentes a las estándar bajo pedido.

NOTA IMPORTANTE:

Nuestros perfiles están diseñados para ser utilizados tanto en interior como en exterior, siempre y cuando no estén expuestos directamente a agentes meteorológicos adversos: lluvia, calor, salitre,… etc.

Es indispensable que el instalador tenga en consideración el factor de dilatación del material. En condiciones de altas temperaturas, acción directa del sol y otras fuentes de calor, el material se dilatará. Es necesario calcular las tolerancias adecuadas para evitar los efectos de este fenómeno.

FULLWAT aluminium profiles offer the fullest range to remark every led lighting project with special kind of touch wherever our led products from this catalog are used. Our profiles reach a double target:

- Best look finishing as possible in every customized project.

- Reliable working with best cooling and stable thermal performance.

Within profiles section we offer recessed or surface mounted models from different pricing level.

There are several models for every application and suitable accessories are available.

Accessories are mandatory wherever necessary to reach fast fixing and fullest professional finishing.

Raw material is first quality alumium 6063 type, made and machined under fully approved processing with anodized finishing.

There are several difusers avaisable for every aluminium model profile with 2m. standard length. (Other sizes availables under request).

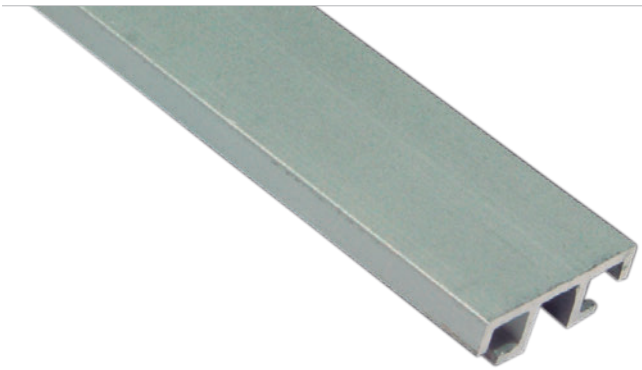
IMPORTANT NOTE:

Our whole product range profiles are designed to be used in indoor or outdoor applications if they are not exposed to adverse weather agents as rain, direct sun lighting or whatever similar conditions.

In case of outdoor applications with high temperature action from sun or other heating sources, installer is obliged to take into account dilatation rate which is real condition.

Under these conditions, profiles will reach bigger size and system will be troubled if tolerances are not calculated previously.

TECOX-ONE



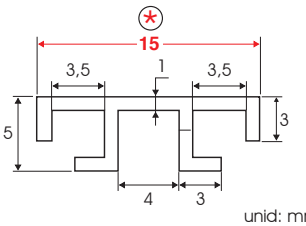
Al 6063 | max 15 W/m | IP20 | 2m

Embalaje: Tubo (mín. 2 unidades) / Bulk (mín. 72 unidades)
Packing: 2 pcs tube / Bulk 72 pcs min.

Perfil TECOX universal de superficie

Este modelo TECOX-ONE representa una solución económica para aumentar las posibilidades de refrigeración en las instalaciones con tiras de led. Se consigue reducir la temperatura media de funcionamiento en unos 6ºC.

Es un perfil básico, sin difusor y para montaje en superficie. Aporta refrigeración en la zona inferior y lateral mediante aletas canalizadas y al mismo tiempo, ofrece una base de fijación fiable para todos los sistemas con tiras de led de distintos anchos y condición.



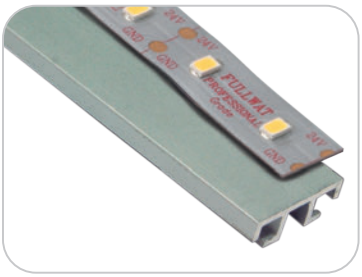
unid: mm

TECOX universal surface profile

Universal Aluminum profile for FULLWAT led strips from DOMOX & PROFESSIONAL series.

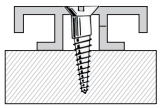
TECOX-ONE is a perfect solution for cooling improvement in your led strips systems so that temperature could be up to 6ºC smaller.

This is a basic purpose profile with no diffuser for surface assembling. Cooling is remarked in bottom and sided areas and additionally, this profile is a reliable fixing system for LED strips models with different wide.



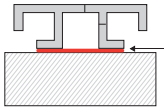
Instalación Installation

montado en superficie
surface mounted



tornillo
screw

Recomendado hacer agujero avellanado y usar un tornillo adecuado.
Countersink hole and screw suggested.



opcional
optional

3M-VHB-5915P/10

cinta adhesiva
scotch tape

Notas Notes

- Potencia de disipación meramente orientativa que depende de las características de la tira de LED utilizada y sobre todo las circunstancias de la instalación como su montaje y ubicación.
- Cooling ability just as reference. Take into account this capacity depends on LED strip type used, installation use and environment.

- Por favor, compare la anchura del perfil con la del rollo elegido.
- Please, check your led strip wide to choose your correct profile.

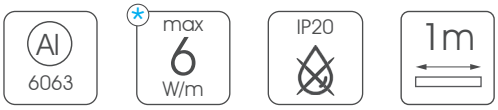
TECOX-TWO

Pletina básica de soporte plano

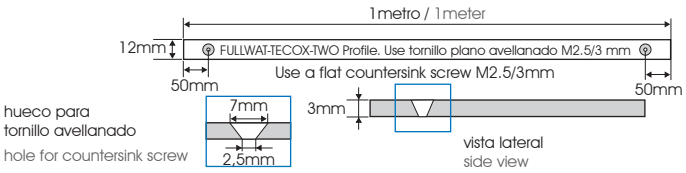
El modelo TECOX-TWO se utiliza como recurso de soporte básico para cualquier tira de led de baja potencia dentro de nuestras gamas DOMOX o PROFESIONAL.

Pletina de aluminio de ancho estándar hasta 12mm que facilita el montaje y la refrigeración básica para tiras de led de baja potencia.

Se suministra en unidades de 1 metro de longitud apilables, con taladros avellanados en ambos extremos para tornillos que simplifican su fijación. No apto para tiras de led superiores a 6w/m.



Embalaje: Bulk (mín. 50 unidades)
Packing: Bulk (50 pcs min.)



Flat basic profile

TECOX-TWO model is simple aluminium profile as basic support for low power led strips from our DOMOX or PROFESSIONAL ranges.

This 12mm profile makes easier low power led strips installing as well as basic cooling performances.

Every flat bar is 1 meter length easily stackable with countersink side holes for easy screws assembling.

Not suitable for leds strips higher than 6w/m.

Instalación Installation

Notas Notes

- Potencia de disipación meramente orientativa que depende de las características de la tira de LED utilizada y sobre todo las circunstancias de la instalación como su montaje y ubicación.
- Cooling ability just as reference. Take into account this capacity depends on LED strip type used, installation use and environment.

- Consultar disponibilidad.
- Check availability.

Accesorios para perfiles de aluminio

Accesories for aluminium profiles

LS-AID-0810
Herramienta para montaje de tiras led

Nuestra herramienta de ayuda al montaje de tiras de led de 8 y 10mm de PCB, es ideal para facilitar al instalador el proceso de fijación y pegado.Sus dos prácticas roldanas están diseñadas especialmente para poder ejercer la presión correcta sobre la tira de led sin peligro de provocar daños en los componentes electrónicos y sus soldaduras.

Es muy habitual que con la premura de la instalación, los profesionales utilicen sus dedos o de forma más común, un destornillador para ejercer presión sobre la cinta buscando una mejor adherencia a la base del perfil. Ambos sistemas son de alto riesgo porque ocasionan con demasiada frecuencia roturas en los leds, resistencias o incluso en las soldaduras, dañando las tiras led, causando un coste adicional de tiempo y material.

El uso de la herramienta **LS-AID-0810** no exime de comprobar la tira de led previamente, pero es una garantía adicional para minimizar el riesgo de daños durante su instalación.

LS-AID-0810
Tool for led strips assembling

Our tool aid for led strips assembling is suitable for easier installer handling while fixing and sticking tasks.

A couple of practical guided drums are designed to put right pressure on led strip avoiding undesired damages on electronic components or soldering pads.

Usually, rush installation stress, drive installer to use fingers or even screwdrivers, as unsuitable tools to get better sticking results when fixing led strips over profiles.

Both systems are high risk equally because are frequently guilty party of breakings on leds, resistors or soldering pads, causing additional time cost by led string changing job.

Using our tool **LS-AID-0810** we are not freed of making proper trials BEFORE LED STICKING, although this is an additional warranty of minimal damages risk once led strip is full assembled.

TRM-BOX-X

Caja de surtido de tubos termotráctiles para protección y aislamiento de empalmes

Surtido de 165 piezas, disponibles en blanco y negro.
Longitud: 95mm **Diámetros:** 2-3-4-5-6-8 mm.

Thermotractile tubes assortment box for suitable cable splices protection

Sensores para instalación oculta sobre perfil

Sensors for hidden profile installing

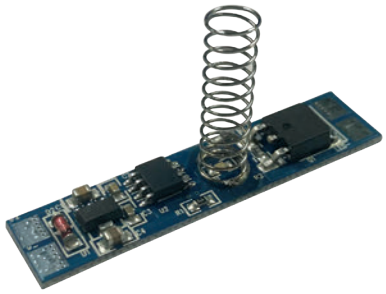
SENS-P-TD-1

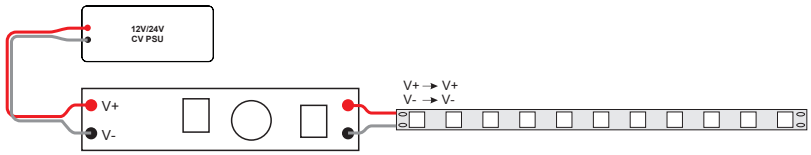
Sensor touch regulador. Función memoria

Interruptor ON/OFF y regulador con función memoria disponible si hay alimentación.

Sensor memory touch switch dimmer

ON/OFF touch switcher with dimming memory function if voltage is still available.





Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 8A
Dimensiones Dimensions	43 x 10mm

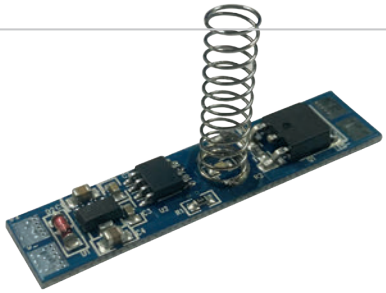
SENS-P-TD-2

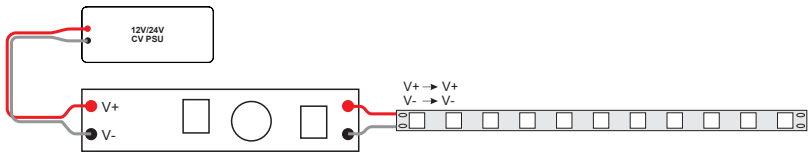
Sensor touch regulador. Función memoria 0V

Interruptor ON/OFF y regulador con función memoria permanente.

Sensor 0V Memory touch switch dimmer

ON-OFF touch dimmer switcher with constant dimming function.





Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 8A
Carga Load	96W 192W para/for 12V 24V
Dimensiones Dimensions	43 x 10mm

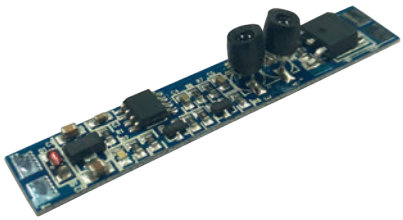
SENS-P-IRM-1

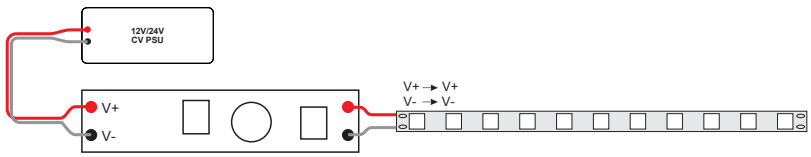
Sensor infrarrojo de mano con regulador

Encendido / apagado automático al pasar la mano por encima. Regulación y función de memoria.

Hand sensor dimmer

Automatically switch ON/OFF when the hand pass over, dimming and memory function.





Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 8A
Carga Load	96W 192W para/for 12V 24V
Dimensiones Dimensions	55 x 10mm
Distancia de detección Detection distance	≤10cm

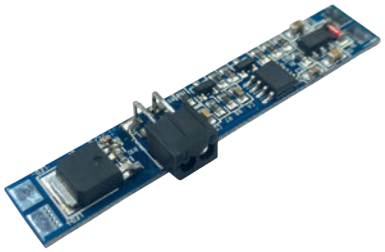
SENS-P-IRP-1

Sensor de puerta dimmer

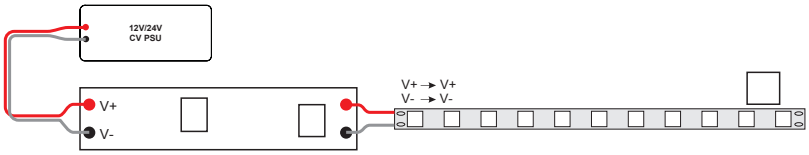
Encendido y apagado automático cuando se abre y se cierra la puerta.

Surface mounting hand sensor

Automatically switch ON and OFF when door is opened or closed.



Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 8A
Carga Load	96W / 192W para/for 12V / 24V
Dimensiones Dimensions	51 x 10mm
Distancia de detección Detection distance	≤10cm



SENS-P-PIR-X

Sensor PIR de movimiento

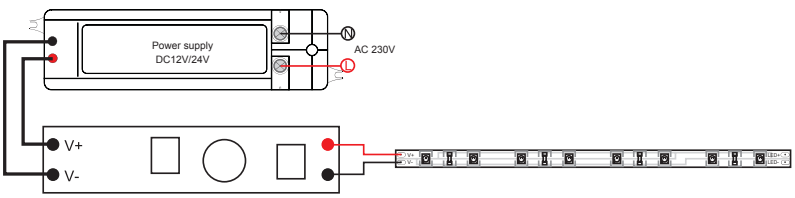
Encendido automático cuando detecta movimiento a una distancia de 2 metros.

PIR Sensor switch

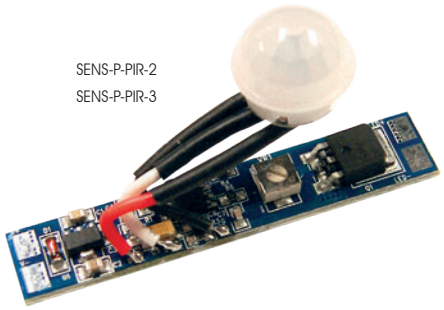
Switch on automatically when detects movement at a distance of 2 meters.

SENS-P-PIR-1

Referencia Part number	**SENS-P-PIR-1**	**SENS-P-PIR-2**	**SENS-P-PIR-3**
Voltaje Voltage	12-24VDC	12-24VDC	12-24VDC
Corriente de entrada Input current	Max. 2.5A	Max. 8A	Max. 8A
Carga Load	30W / 60W para/for 12V / 24V	30W / 60W para/for 12V / 24V	30W / 60W para/for 12V / 24V
Dimensiones Dimensions	62.5 x 10mm	62.5 x 10mm	55 x 10mm
Distancia de detección Detection distance	≤200cm	≤200cm	≤200cm
Retardo Delay time	6-70s ajustable / adjustable	6-70s ajustable / adjustable	40s (fijo)

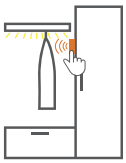


SENS-P-PIR-2
SENS-P-PIR-3



Sensores para instalación externa

Sensors for external installing



SENS-E-TD-1

Sensor touch DIM para superficie

Interruptor ON/OFF y regulador.
Sin función de memoria.

Surface touch dimmer

Non-memory external switch ON/OFF and dimmer.
No memory function.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Conector Connector	DC Jack Ø5,5 x 2,1
Dimensiones Dimensions	41 x 31 x 9mm

SENS-E-TD-2

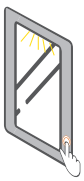
Sensor touch DIM para madera y cristal

Interruptor ON/OFF y regulador con función memoria.

Touch dimmer for wood panel or glass

With memory external switch ON/OFF and dimmer.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Conector Connector	DC Jack Ø5,5 x 2,1
Dimensiones Dimensions	38 x 38 x 7mm
Distancia de detección Detection distance	≤25cm



SENS-E-TD-3

Sensor touch DIM para empotrar

Interruptor ON/OFF y regulador con función memoria.

Memory touch switch dimmer for recess

With memory external switch ON/OFF and dimmer.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 2A
Conector Connector	L813
Dimensiones Dimensions	Ø21mm

SENS-E-IRM-1

Sensor de mano dimmer

Encendido / apagado automático al pasar la mano por encima. Regulación y función de memoria.

Hand sensor dimmer

Automatically switch ON/OFF when the hand pass over, dimming and memory function.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Carga Load	48W 12V 96W para/for 24V
Conector Connector	DC Jack Ø5,5 x 2,1
Dimensiones Dimensions	12 x 12mm
Distancia de detección Detection distance	≤10cm

SENS-E-IRP-1

Sensor de puerta dimmer

Encendido y apagado automático cuando se abre y se cierra la puerta.

Surface mounting hand sensor

Automatically switch ON and OFF when door is opened and closed.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Carga Load	48W 12V 96W para/for 24V
Conector Connector	DC Jack Ø5,5 x 2,1
Dimensiones Dimensions	12 x 12mm
Distancia de detección Detection distance	≤10cm

SENS-E-PIR-1

Sensor PIR de movimiento

Se enciende automáticamente cuando detecta movimiento a una distancia de 2 metros.

PIR Sensor switch

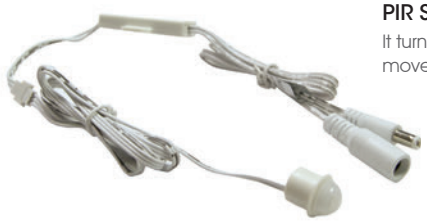
It turns on automatically when it detects movement at a distance of 2 meters.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Carga Load	48W 12V 96W para/for 24V
Conector Connector	L813
Dimensiones Dimensions	45 x 62mm
Distancia de detección Detection distance	≤200cm

Sensores para instalación externa

Sensors for external installing

SENS-E-PIR-2



Sensor PIR de movimiento para empotrar

Se enciende automáticamente cuando detecta movimiento a una distancia de 2 metros.

PIR Sensor switch

It turns on automatically when it detects movement at a distance of 2 meters.

Voltaje Voltage	12-24VDC
Corriente de entrada Input current	Max. 4A
Carga Load	48W para/for 12V 96W para/for 24V
Conector Connector	DC Jack Ø5,5 x 2,1
Dimensiones Dimensions	17 x 20mm
Distancia de detección Detection distance	≤200cm

SENS-ADAP

Cable adaptador sensores serie SENS

SENS series sensor adapter cable

Conector Connector	L813
Longitud del cable Wire length	2m

EXT-XX

Referencia Part number	**EXT-2B**	**EXT-2A**	**EXT-4**
Conector Connector	Jack Hembra	Jack Macho	Jack Macho-Macho
Diámetro Diameter	5.5 x 2.1mm	5.5 x 2.1mm	5.5 x 2.1mm
Longitud Lenght	150mm	150mm	110mm

Próximamente:

Iluminación LED decoración

Rollos flexibles de LED

Rollos de neón - LED

Control y amplificación rgb para LEDs

Perfiles de aluminio

Bañadores de pared y barras de LED

Módulos de LED

Coming soon:

LED lighting decoration

Flexible LED strips

Neon-LED strips

LED rgb control & rgb power amps

Aluminium profiles

LED wall washers and LED bars
