NEON LED STRIP INSTRUCTION AND CAUTION

Light Profile

Correct bending way

Face to the light surface fold the strip, the minimum bending diameter is 100mm.

Light surface upwards, the strip is bendable to right or left naturally, the minimum bending diameter is 100mm.

Bending direction Profile

Incorrect bending way

Face to the side surface, (as the picture shows) Do not bend downward to damage the strip.

Face to the side surface, (as the picture shows) Do not bend upward to damage the strip.

(as the picture shows) please do not twist the strip, or it will be damaged.
